KATHANIKA MOGERAYA

Moodbidri, Karnataka
+91 81205 94814 kathanikam@gmail.com Kathanika_Mogeraya

Objective

Aspiring software developer with interests in AI, problem-solving, and application development. Passionate about learning new technologies and building efficient software solutions.

Education

Visvesvaraya Technological University **December 2022 – May 2026**

*Bachelor of Engineering in Computer Science and Design Engineering (CGPA of **7.82**).* *Karnataka, India*

Projects

From May 2024 till July 2024

Study Material Management System

Developer

Highlights of Project:

- Tech Stack: HTML, CSS, MySQL
- Developed a web-based platform for uploading and accessing study materials.

From February 2025 till January 2026

Enhanced Emotion-aware Conversational Agent Using Multimodal Deep Learning

Developer

Highlights of Project:

- Tech Stack: Python, Deep Learning, BERT, CNN
- Developed an AI-based conversational agent with chat and live video interaction features.
- Implemented textual emotion detection using BERT and facial emotion recognition using CNN models.
- Designed the system for future multimodal integration and empathetic AI interactions.

Internship

Android App Development using Generative AI

Intern | MindMatrix | February 2026 – May 2026

Highlights:

Developed Android application UI and interactive components using Android Studio.

Worked on integrating Generative AI concepts and user-focused app features.

Improved understanding of mobile application development, APIs, and real-time interaction design.

Collaborated on project requirements, UI enhancement, and feature implementation.

Full Stack Java Development Internship

Intern | Tap Academy | July 2026 – Present

Highlights:

Building full-stack web applications using Java, MySQL, HTML, CSS, and JavaScript.

Learning backend development with Java and database integration using MySQL.

Developing responsive user interfaces and strengthening problem-solving and software development skills through hands-on projects.

Achievements

- **NPTEL:** Programming in C, Programming in Java.
- **CodeChef:** Data Structure and Analysis, Analysis of Design in Algorithm.
- **Infosys Springboard:** Speak Smart - Spoken English Proficiency – Advance

Technical Skills:

Programming Languages – C, Java, Python
Core Concepts: Object-Oriented Programming, Data Structures, Core Java, JDBC
Database – MySQL
Web Technologies – HTML, CSS
Tools & Platforms: Android Studio, Figma
